

IN THE CLAIMS

Claims 1-64 are presented below:

1. (Currently Amended) A projection display apparatus that carries out processing with information stored in a portable memory, comprising:

a memory controller configured to read out the information stored in the portable memory, the information including image data representing a plurality of presentation sheets prepared in advance by a user of the projection display apparatus;

an image memory configured to store embellishment data;

an image processing section configured to prepare display image data by using the image data stored in the portable memory according to an instruction of a processing program which is read from the portable memory and which represents a series of processing steps to be executed by the projection display apparatus to display the plurality of presentation sheets;

an electro-optic device configured to form image light in response to the display image data; and

an optical system configured to project the image light to display the image,

wherein the image processing section is configured to combine at least one of the image data read from the portable memory and image data supplied externally with the embellishment image data according to an instruction of composition included in the processing program, so as to prepare the display image data.

2. (Original) A projection display apparatus in accordance with claim 1, wherein the

image processing section is configured to control the projection display apparatus according to an instruction of the processing program.

3. (Original) A projection display apparatus in accordance with claim 2, wherein the control of the projection display apparatus includes control of an electric power supply circuit.

4. (Original) A projection display apparatus in accordance with claim 1, wherein the projection display apparatus is configured to reproduce sound based on the information stored in the portable memory.

5. (Original) A projection display apparatus in accordance with claim 2, wherein the projection display apparatus is configured to reproduce sound based on the information stored in the portable memory.

6. (Original) A projection display apparatus in accordance with claim 3, wherein the projection display apparatus is configured to reproduce sound based on the information stored in the portable memory

7. (Original) A projection display apparatus in accordance with claim 1, wherein the image processing section is configured to select at least one of image data supplied externally

and image data read from the portable memory according to an instruction of selection included in the processing program, and to prepare the display image data using the selected image data.

8. (Original) A projection display apparatus in accordance with claim 2, wherein the image processing section is configured to select at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program, and to prepare the display image data using the selected image data.

9. (Original) A projection display apparatus in accordance with claim 3, wherein the image processing section is configured to select at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program, and to prepare the display image data using the selected image data.

10. (Original) A projection display apparatus in accordance with claim 4, wherein the image processing section is configured to select at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program, and to prepare the display image data using the selected image data.

Claims 11-15. (Canceled)

16. (Original) A projection display apparatus in accordance with claim 1, wherein the image processing section comprises a processing program editor configured to edit the processing program, and

the memory controller is configured to write the processing program edited by the processing program editor into the portable memory.

17. (Original) A projection display apparatus in accordance with claim 2, wherein the image processing section comprises a processing program editor configured to edit the processing program, and

the memory controller is configured to write the processing program edited by the processing program editor into the portable memory.

18. (Original) A projection display apparatus in accordance with claim 3, wherein the image processing section comprises a processing program editor configured to edit the processing program, and

the memory controller is configured to write the processing program edited by the processing program editor into the portable memory.

19. (Original) A projection display apparatus in accordance with claim 4, wherein the image processing section comprises a processing program editor configured to edit the processing program, and

the memory controller is configured to write the processing program edited by the processing program editor into the portable memory.

20. (Original) A projection display apparatus in accordance with claim 7, wherein the image processing section comprises a processing program editor configured to edit the processing program, and

the memory controller is configured to write the processing program edited by the processing program editor into the portable memory.

21. (Currently Amended) A projection display apparatus in accordance with claim ~~4~~1, wherein the image processing section comprises a processing program editor configured to edit the processing program, and

the memory controller is configured to write the processing program edited by the processing program editor into the portable memory.

22. (Currently Amended) A method of displaying an image with a projection display apparatus that includes an electro-optic device and carries out processing with information stored in a portable memory, the method comprising the steps of:

reading out the information stored in the portable memory, the information including image data representing a plurality of presentation sheets prepared in advance by a user of the projection display apparatus;

storing embellishment image data;

preparing display image data by using the image data stored in the portable memory according to an instruction of a processing program that is read from the portable memory and represents a series of processing steps to be executed by the projection display apparatus to display the plurality of presentation sheets;

causing the electro-optic device to form image light in response to the display image data;

projecting the image light to display the image; and

combining at least one of the image data read from the portable memory and image data supplied externally with the embellishment image data according to an instruction of composition included in the processing program, so as to prepare the display image data.

23. (Currently Amended) A projection display apparatus comprising:

means for reading from a portable memory a plurality of presentation sheets prepared in advance by a user of the display apparatus;

means for storing embellishment data;

means for preparing a display image data from information read by said means for reading, said display image data representing the plurality of presentation sheets, said display

image data being prepared according to an instruction of processing program read from the portable memory;

means for combining at least one of the image data read from the portable memory and the image data supplied externally with the embellishment image data according to an instruction of composition included in the processing program, so as to prepare the display image data;

means for forming image light in response to said display image data; and

means for projecting said image light on a projection screen to thereby display the presentation sheet.

24. (Original) The method of claim 22, further comprising controlling the projection display apparatus according to an instruction of the processing program.

25. (Original) The method of claim 24, wherein the step of controlling the projection display apparatus comprises controlling an electric power supply circuit.

26. (Original) The method of claim 22, further comprising reproducing sound based on the information stored in the portable memory.

27. (Original) The method of claim 24, further comprising reproducing sound based on the information stored in the portable memory.

28. (Original) The method of claim 25, further comprising reproducing sound based on the information stored in the portable memory.

29. (Original) The method of claim 22, further comprising:  
selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program;  
and  
preparing the display image data using the selected image data.

30. (Original) The method of claim 24, further comprising:  
selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program;  
and  
preparing the display image data using the selected image data.

31. (Original) The method of claim 25, further comprising:  
selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program;  
and  
preparing the display image data using the selected image data.

32. (Original) The method of claim 26, further comprising:

selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program;  
and

preparing the display image data using the selected image data.

Claims 33-37. (Canceled)

38. (Original) The method of claim 22, further comprising:

editing the processing program, and

writing the processing program edited by the processing program editor into the portable memory.

39. (Original) The method of claim 24, further comprising:

editing the processing program, and

writing the processing program edited by the processing program editor into the portable memory.

40. (Original) The method of claim 25, further comprising:

editing the processing program, and

writing the processing program edited by the processing program editor into the portable memory.

41. (Original) The method of claim 26, further comprising:  
editing the processing program, and  
writing the processing program edited by the processing program editor into the portable memory.

42. (Original) The method of claim 29, further comprising:  
editing the processing program, and  
writing the processing program edited by the processing program editor into the portable memory.

43. (Currently Amended) The method of claim ~~33~~22, further comprising:  
editing the processing program, and  
writing the processing program edited by the processing program editor into the portable memory.

44. (Canceled)

45. (Original) The apparatus of claim 23, further comprising means for controlling the projection display apparatus according to an instruction of the processing program.

46. (Original) The apparatus of claim 45, wherein the means for controlling the projection display apparatus comprises means for controlling an electric power supply circuit.

47. (Original) The apparatus of claim 23, further comprising means for reproducing sound based on the information stored in the portable memory.

48. (Original) The apparatus of claim 45, further comprising means for reproducing sound based on the information stored in the portable memory.

49. (Original) The apparatus of claim 46, further comprising means for reproducing sound based on the information stored in the portable memory.

50. (Previously Presented) The apparatus of claim 23, further comprising means for selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program; and means for preparing the display image data using the selected image data.

51. (Original) The apparatus of claim 45, further comprising means for selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program; and  
means for preparing the display image data using the selected image data.

52. (Original) The apparatus of claim 46, further comprising means for selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program; and  
means for preparing the display image data using the selected image data.

53. (Original) The apparatus of claim 47, further comprising means for selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program; and  
means for preparing the display image data using the selected image data.

Claims 54-58. (Canceled)

59. (Previously Presented) The apparatus of claim 23, further comprising means for editing the processing program, and  
means for writing the processing program edited by the processing program editor into the portable memory.

60. (Original) The apparatus of claim 45, further comprising means for editing the processing program, and

means for writing the processing program edited by the processing program editor into the portable memory.

61. (Original) The apparatus of claim 46, further comprising means for editing the processing program, and

means for writing the processing program edited by the processing program editor into the portable memory.

62. (Original) The apparatus of claim 47, further comprising means for editing the processing program, and

means for writing the processing program edited by the processing program editor into the portable memory.

63. (Original) The apparatus of claim 50, further comprising means for editing the processing program, and

means for writing the processing program edited by the processing program editor into the portable memory.

64. (Currently Amended) The apparatus of claim ~~54~~23, further comprising means for editing the processing program, and

means for writing the processing program edited by the processing program editor into the portable memory.
